## PROFILE

I am currently working as a web developer. I have been learning coding since I was 15 years old. When I started attending web development course, I was into it and after that, I nurtured my skills for web development. I started working as my first job as a Frontend Developer for HR Software Company and got a lot of experience , I did write bootstrap and angular for it , as backend, had to use C# .Net. Finishing works before decline and working together with seniors from that company were precious for me. Secondly, I worked as a web developer for writing API for Chat Application and handling admin dashboard for Pay Application. Tools like Postman for Api testing and, working together with teammates through version control system like Github and Gitlab at there. I had to use php, laravel as framework, pushy, pusher, and bootstrap at there. While working at there, with the help of my friend, involved in Techstart project. Additionally, wrote React Website with Tailwind CSS. Now, I am maintaining for it.

## PROFESSIONAL EXPERIENCE

June 2022 -  
September 2022  
Yankin,  
Myanmar (Burma)

### **Smilax Global, Frontend Developer**

I was a highly motivated and skilled Frontend Developer with experience in C# .NET and Angular, seeking a challenging position in software development. I was passionate about creating innovative and user-friendly HR software solutions to enhance organizational efficiency and employee experience when I worked there.

- *Developed and maintained frontend components for an HR software solution using C# .NET and Angular, ensuring high performance and responsiveness.*

January 2022 -  
present  
Myaynigone,  
Myanmar (Burma)

### **Nine Complex, Web Developer**

Innovative chat applications, My ultimate goal is to deliver seamless user experiences by leveraging the latest technologies and industry best practices.

Projects:

Chat Application:

- Designed and developed a robust chat API using Laravel and PHP, enabling real-time messaging capabilities through Pusher integration.
- Implemented secure authentication and authorization processes using Laravel middleware and controller functions.
- Conducted comprehensive PHP unit testing to ensure reliability and functionality.
- Utilized SQL queries for efficient message storage and retrieval.
- Thoroughly tested and documented API endpoints using Postman for seamless integration with the frontend components

### **Techstar Myanmar,**

*Junior Software Engineer(Part Time) @*

Developed and maintained frontend components for web applications using Next.js and Tailwind CSS.

- Collaborated closely with a team of developers and designers to gather requirements and implement responsive and visually appealing user interfaces.
- Utilized Next.js, a powerful React framework, to build efficient and scalable web applications.
